

Vertebrate Toxic Agents and Fumigants Requiring a Licence as at 1 November 2004

This is a list of vertebrate toxic agents and fumigants that will require a person to hold a Controlled Substances Licence to possess these pesticides (See our website www.ermanz.govt.nz/hs/hs-compliance.asp for the transitional dates which apply to each substance). All these pesticides will also require tracking (see our guide on tracking www.ermanz.govt.nz/resources/publications/pdfs/ER-QG-30-1.pdf).

Some vertebrate toxic agents such as brodifacoum and cholecalciferol do not require a person to have a Licence. These vertebrate toxic agents are not included in this list. **Pindone** is included on the list as a Licence is required by ACVM due to residue issues. For further information on the transfer of pesticides, including a **list of all products transferred and their HSNO controls** see: <http://www.ermanz.govt.nz/hs/transfer-pesticides.asp>.

Vertebrate Toxic Agents

3-choloro-p-toluidine hydrochloride
 Encapsulated potassium cyanide
 Sodium cyanide paste
 Yellow phosphorous paste

Fumigants

1,3-dichloropropene liquid
 1,3-dichloropropene & chloropicrin liquid
 Chloropicrin liquid
 Hydrocyanic acid discoid
 Methyl bromide gas
 Methyl bromide & chloropicrin gas
 Phosphine gas
 Aluminium phosphide pellets
 Magnesium phosphide pellets
