Application Form (HS9) for Advice on Labels

Send by post to: ERMA New Zealand, PO Box 131, Wellington OR
 email to label@ermanz.govt.nz (Please read the instructions before drafting the label and filling the form)

Company name:		
Company address:		
Postal address [if different to company address]		
Contact name:		
Job title		
Contact person phone / e-mail:	(0)	

1) Product name[®]:

2) How was the substance approved? (Please tick one of the following boxes and provide the information that is required for that approval pathway)

Part V

HSNO Approval Number:

Gazette Notice

HSNO Approval Number:

Substance description:

Group Standard

HSNO Approval Number:

Title of Group Standard:

SOS

SOS Number:

3) HSNO Classification (or proposed classification):

[Note: If you cannot provide a classification, you will need to submit an HS6 for ERMA New Zealand to classify the substance prior to requesting this label advice]

4) Draft label enclosed Yes

[®] This is the name of the product/substance for which you are seeking advice.

Initial fee of \$112.50 (GST inclusive) is included

(If fee is not included, you will be invoiced and processing will not start until payment is received)

Instructions to complete form

You need to ensure that all relevant information is provided in full. If the form is incomplete, we will be unable to process your enquiry and will need to contact you to fill in the missing information.

If you have self classified the substance, the label advice will be based on the classifications you have provided. ERMA New Zealand will not classify your substance as part of this label advice. If you want ERMA to classify the substance, then you need to submit an HS6 form.

Please note if your product was approved by a Group Standard or will be covered by one you have to comply both with the Labelling Requirements of that Group Standard and the Hazard and Precautionary Statement document:

<http://www.ermanz.govt.nz/hs/groupstandards/standards/ss/hplabelling.pdf>

For all other approval pathways you have to comply with the Hazardous Substances (Identification), (Emergency Management), and the (Disposal) Regulations 2001. The Hazard and Precautionary Statement

<http://www.ermanz.govt.nz/hs/groupstandards/standards/ss/hplabelling.pdf> is one means of compliance with the regulatory requirements.
